

PD-L1:

GAPDH:

Experiment 1

Experiment 2

Experiment 3

Line	Sample
1	ctrl
2	5 mM metformin
3	0.6 mM 2DG
4	5 mM metformin + 0.6 mM 2DG
5	5 mM metformin + 0.6 mM 2DG float
6	4.8 mM 2DG
7	4.8 mM 2DG float
8	5 mM metformin + 4.8 mM 2DG
9	50 ng/mL tunicamycin
10	50 ng/mL tunicamycin float
11	polyHEMA
12	10 mM H2O2
13	5 µM MG-132
14	ctrl

Figure 8 – Figure supplement 1, Source Data. Original membranes corresponding to Figure 8 – Figure supplement 1. Figure presents 3 independent experiments, where blots from sample 1 to sample 11 are shown. Samples 12-14 represent untreated and positive control. Molecular weight markers were employed.
